Update on Australian Government Research Initiatives - DIISR

17th September 2010

Dr Anne Byrne
Research Division
ICT policy and DIISR

DIISR

- Minister – Senator Kim Carr
- Secretary – Mr Mark Paterson
- DIISR policies and initiatives relevant to ICT
  - Research workforce strategy (current & future research skill needs)
  - eResearch Infrastructure (NCRIS & Super Science initiatives)
  - IT Industry Innovation Council
eResearch Infrastructure

FACTS

- Since 2007, $82 million has been invested in eResearch infrastructure under the National Collaborative Research Infrastructure Strategy (NCRIS)
- In the 2009 Budget a further $312 million was invested in eResearch as part of the Super Science Initiative.
- Coordination support is provided by the Australian eResearch Infrastructure Council (AeRiC)

EXAMPLES

- $22.5m for Interoperation and Collaboration Infrastructure (NCRIS)
- $48m for the Australian Research Data Commons (Super Science)
- $37m for the National Research Network (Super Science)
IT Industry Innovation Council

FACTS

- Established in 2009 as an advisory body to the Minister
- The IT Industry Innovation Council provides
  - Leadership in building linkages with the IT sector’s stakeholders and the Government’s innovation policies and programs.
  - An advocacy role for the IT industry, championing innovation
  - Links on cross-cutting issues with other Industry Innovation Councils

OTHER ACTIVITIES

- Strategic Road Map for 2009-2014
- IT Supplier Advocate announced in April 2010 (Mr Don Easter)
- Contact: itiic.secretariiat@innovation.gov.au
Research Workforce Strategy

BACKGROUND

• Australian Government support for research and research training
  – $1.342 billion in 2009/10 (e.g. for RTS, RIBG, APAs etc.)
• A number of 2008 reviews and inquiries identified research training and research workforce issues.
• The Research Workforce Strategy (RWS) aims to address concerns regarding:
  – Australia’s capacity to deliver required levels of research workforce growth
  – The efficacy of the research training system in preparing students for varied career outcomes
• The RWS underpins wider efforts by the Australian Government to lift Australia’s research and innovation performance and boost national productivity.
Research Workforce Strategy

GOVERNANCE

- The development of the Strategy is being anchored by DIISR
- Reference Group established to support the Strategy’s development
  - DIISR, DEEWR, UA, GO8, ATN, IRUA, unaligned unis, NTEU, CAPA, FASTS, CHASS, NAF, BCA, AIG, Skills Australia, Professions Australia

3 Subgroups:
- Employer demand for researchers
- Research training experience
- Research career pathways
IT-related insights (from the RWS)

CONSULTATIONS
- IT Industry Innovation Council members (May 2010)
- Australian eResearch Infrastructure Council (AeRiC) (June 2010)
- RWS Consultation Paper Submissions (August 2010)

- Generic issues raised in consultations
  - better communication between university training providers and employers of current and future training needs,
  - look to overseas suppliers of maths-trained students
IT-related insights (2)

IT-specific issues raised in consultations

- Need for more IT and eResearch related skills
- IT research candidates limited by immigration restrictions
- IT researchers require dual specialisation
- There is a shortage of women in IT
- Communication skills are required to bridge client/technical gap
- Need short university-based training modules to help IT researchers become industry ready
- Lack of interest in high school maths will impact of IT pipeline
- NICTA is a reservoir of IT expertise
- Australia’s strength is in software (not hardware) development
- Human uptake of technology is a limiting factor
- Better systems integration required
- Industry accreditation standards currently being developed
- Expected future growth in health, telecommunications, environment and high performance computing,
IT-related insights (3)

IN-HOUSE IT-related ANALYSIS

- ACER study – *Supply, demand and characteristics of the HDR population in Australia*
- HDR completions/commencements data (HESC)
- ABS 2006 Census demographic information

KEY MESSAGES

- Growth in future demand for IT researchers
- HDR commencement and completion data for IT matches general trends
- Positive trends in age profile of IT doctorate holders may assist in meeting future demand
HDR commencements, 2001 to 2008

Source: DEEWR unistats unpublished data

Discussion questions

• Do we have the right policy levers in place to support Australia’s research workforce?

• What additional actions might be taken through the research workforce strategy?

• What are the key areas for IT that would benefit from future focus from your perspective?
